Abstract (en)
[origin: WO2022099332A1] The invention relates to furniture fittings (4) for the movable mounting of at least one furniture part (3) on a furniture body (2), comprising: - a lever mechanism (5) for moving the at least one furniture part (3), wherein the lever mechanism (5) comprises at least one lever (5a) which is mounted to pivot about a joint axis (21a), wherein the at least one lever (5a) has at least one, particularly cylindrical, opening (23), in which the joint axis (21a) is disposed with play, - at least one force accumulator (10), more particularly one comprising a spring device, for applying a force to the lever mechanism (5), wherein the at least one joint axis (21a) can be moved, in the case of a pivot movement of the at least one lever (5a) under the influence of the at least one force accumulator (10), from a first rest position (24a) in the at least one opening (23) into a second rest position (24b) in the at least one opening (23), wherein at least one spring element (25) is provided which applies a force (F1, F2) to the joint axis (21a) at least in a direction transverse to an imaginary line (26) connecting the two rest positions (24a, 24b) of the at least one joint axis (21a) in the at least one opening (23) of the at least one lever (5a).
