Abstract (en)
[origin: CA3196869A1] The invention relates to a system (1) for capturing braking particles of a friction brake system (10), which comprises a vacuum source (20), a pneumatic circuit (30) connecting the friction brake system (10) to the vacuum source (20), and a particle filtration system (40) located on the pneumatic circuit (30) and comprising a support (41) and a filter (42), said filter being mounted on the support (41) and, during operation, becoming clogged with particles, preferentially on the surface. The capture system (1) further comprises a storage container (50) which is adapted to receive particles that become detached from the filter (42).
