Abstract (en)
[origin: WO2022100978A1] The present invention provides a fuel conveying device (10) for conveying a fuel for a fuel cell system, comprising a first conveying path (F1) for the fuel with a first conveying device (FE1); a second conveying path (F2) for the fuel with a second conveying device (FE2); an opening region (MB), in which the first conveying path (F1) and the second conveying path (F2) open into one another; and - a common outlet opening (AO) for the fuel, which outlet opening (AO) adjoins the opening region (MB), and through which outlet opening (AO) the fuel can be output to a fuel cell.
