Abstract (en)

The present invention relates to a padel tennis racquet (10), including a handle portion (12) configured to be gripped by a user and a head portion (14) connected to the handle portion (12). The head portion (14) includes at least two striking sides (20, 22) each configured to strike a padel tennis ball. One striking side (20) has a structural configuration which differs from a structural configuration of the other striking side (22) such that one or more playing characteristics of the padel tennis racquet (10) vary between the two striking sides (20, 22). The invention also relates to a method for manufacturing a padel tennis racquet (10).
