Abstract (en)
This blank is provided with: a plurality of panel parts which are continuous with a folding line therebetween; a plurality of outer panel parts included in the plurality of panel parts and having an outer surface serving as an outer surface of a package; and a textured part formed on the outer surface of at least one outer panel part, the outer surface relatively protruding or recessed compared to a surrounding area thereof. In the textured outer panel part having the outer surface with the textured part formed thereon, the textured part is arranged to be separated from a ridge-line forming part comprising a folding line or a free edge for defining a region of the textured outer panel part and forming a ridge line of the package, and a ridge-line proximate textured part which is a textured part of which a minimum separation dimension with respect to at least the ridge-line forming part is set at 5 mm or less is provided so that the minimum separation dimension is 0.5 mm or more.
