Abstract (en)  
The present invention concerns a combination appliance (10) comprising a cooking hob (12) and an extraction device (14) for an extraction of kitchen exhaust air. The extraction device (14) comprises an extraction device housing (28), which is arrangeable at a bottom side of the cooking hob (12), preferably at a bottom wall (60) of a cooking hob housing (62). The extraction device housing (28) comprises a basic structure or carrying structure and/or at least one housing wall, and b. attachment points and/or fastening means for an arrangement and/or attachment of a module or a component, particularly of at least a majority of modules or components, more particularly of all modules or components, of the extraction device (14), and/or of at least one module or component, in particular a power board module (54), of the cooking hob (12) in or at the basic structure or carrying structure and/or on the at least one housing wall of the extraction device housing (28). Further disclosed is a method for assembling a combination appliance (10).
