Abstract (en)

An information display system includes an acquisition unit (401, 501, 601, 701, 802) to acquire detection information including information on a posture of a user and information on a line of sight of the user, a projection unit (501, 601, 507, 613, 807) to project an image onto a projection destination located in a projection direction with respect to the user, and a projection control unit (401, 501, 601, 701, 803, 803a, 803b) to cause the image to be projected onto the projection destination based on the detection information and information on the projection direction.
