Abstract (en)  
[origin: WO2022106596A1] The invention relates to a composition comprising (i) a specific pyrazole or an agriculturally acceptable salt thereof; (ii) a phosphonic acid or an agriculturally acceptable salt thereof; (iii) optionally, one or more carboxylic acids, agriculturally acceptable salts or anhydrides thereof; and (iv) optionally, one or more glycols. Compared to conventional compositions, the compositions according to the invention provide improved solubility of salts of pyrazoles such as 3,4 DMPP in aqueous solution. The solutions are stabilized against crystallization by lowering the crystallization point.
