Abstract (en)

[origin: WO2022106464A2] The invention relates to a brewing unit (1), in particular a horizontally oriented brewing unit (1), of a piston coffee machine, wherein the brewing unit (1) is designed having a brewing slide (2) as a brewing chamber, a fill tray (3), a machine frame having two base plates (5, 5a), two piston units in the form of a showerhead (12) and a plunger (13), and at least one drive motor, wherein the brewing unit (1) can be moved into four brewing unit positions (A, B, C, D), with brewing unit position (B) forming a first filling position of the brewing unit (1) for supplying ground coffee (K) or cleaning agents, characterised in that the brewing unit (1) has at least one second filling position for supplying ground coffee or cleaning agents in brewing unit positions (A, C, D). The invention also relates to a piston coffee machine and to a method for filling a brewing unit (1).
