Abstract (en)

[origin: WO2023012070A1] The invention relates to a fifth wheel coupling (1), comprising a fifth wheel coupling plate (10), a plug (50), a drive (60) and a guide assembly (20) for the plug (50), wherein: the fifth wheel coupling plate (10) has a semi-trailer surface (12); the semi-trailer surface (12) has a normal (N12) pointing outward; the normal (N12) pointing outward is parallel to a height direction (H); the fifth wheel coupling plate (10) has a retraction opening (14); the retraction opening (14) extends in a retraction direction (E); the plug (50) can be moved from a first position, in particular a retracted position, into a second position, in particular an extended position, by means of the drive (60); the plug (50) is guided from the first position into the second position and/or from the second position into the first position by the guide assembly (20); between the first position and the second position, there is an offset in the height direction (H) and in the retraction direction (E).
