Abstract (en)

[origin: WO2022106209A1] The invention relates to a method for packing flat substrates, more particularly glass substrates, in a packaging box comprising: providing a base part of the packaging box, the base part comprising a lower wall and preferably four side walls, placing a flat substrate directly or indirectly on the lower wall of the base part of the packaging box, placing an intermediate layer directly or indirectly on the placed flat substrate, forming a stack of flat substrates and intermediate layers therebetween by repeating the preceding two steps, and setting a cover part of the packaging box on the base part of the packaging box. The invention also relates to packed flat substrates produced in accordance with the method, and a method for unpacking packed flat substrates.
