Abstract (en)

[origin: WO2022106495A1] The invention relates to a sealed lid (2) for use with a receptacle (1) comprising an upper edge (10) and a side wall (12) having an annular lower rim (14), the sealed lid (2) comprising an annular support element (20), a closure part (30) and an attachment member (40) connected to the closure part (30) by a first resilient hinge (50). According to the invention, the sealed lid (2) comprises a ring (60) configured to be mounted around the receptacle (1) coming to bear under the annular lower rim (14), the attachment member (40) being configured to engage with the ring (60) so that the annular support element (20) ensures a seal with the upper edge (10) when the ring (60) bears under the annular lower rim (14) and when the attachment member (40) engages with the ring (60).
