Abstract (en)  
[origin: WO2022106049A1] The invention relates to copolymers that contain structural units of the formula (I), of the formula (II) and optionally of the formula (III) -NR1-CHR3-CHR4- (I), -NH-CO-CHR7- (II), -NH-CHR9-CHR10- (III), or structural units of the formula (IV), of the formula (V) and optionally of the formula (VI) NR1-CHR3-CHR4-CHR5- (IV), -NH-CO-CHR7-CHR8- (V), -NH-CHR9-CHR10-CHR11- (VI), wherein R1 is a residue of the formula -CO-R2, of the formula -CO-NH-R2 or of the formula -CH2-CH(OH)-R12, R3, R4, R5, R7, R8, R9, R10 and R11 independently of each other represent hydrogen, methyl, ethyl, propyl or butyl, and R2 and R12 represent hydrogen or selected organic residues. These copolymers are characterized by good degradability and can be used, for example, for preparing active ingredient formulations.
