Abstract (en)
[origin: WO2022106148A1] The invention relates to improvements in the technical field of sanitary technology. Thus, the invention relates to an outlet element (1) for a sanitary fitting, which outlet element has a main element (2) and a valve device (3) connected to the main element (2), which valve device can be moved between at least two switching positions relative to the main element (2) in order to switch between at least two separate water conduits (4, 5). In order to allow the outlet element (1) to be fastened to an outlet of a sanitary fitting as easily as possible, the outlet element (1) has a threaded connecting piece (13) with an external screw thread (19), the threaded connecting piece (13) being molded onto the main element (2).
