Abstract (en)

[origin: WO2022108817A1] A grease filter comprises an external frame, a baffle filter, and a first housing element. The external frame defines a pathway for airflow therethrough and partially defines an upstream portion of the grease filter and a downstream portion of the grease filter. The baffle filter is disposed within the downstream portion of the grease filter and secured within the external frame. The first housing element is positioned within the upstream portion of the grease filter and is configured to provide support to a filter pad to maintain the filter pad in a generally flat configuration.
