Abstract (en)
[origin: WO2022112363A1] The invention relates to a food portion control device (100) comprising a hollow body (10) defining a useful volume (11), vertical walls (20a, 20b, 20c) dividing the useful volume into at least two compartments (11a, 11b, 11c), and a central axis (40) from which said walls extend radially, said device comprising a movable wall (30a, 30b, 30c) which is vertical in at least one compartment and which is capable of pivoting about the axis (40) in such a way as to cause a volume of use of only said compartment to vary.
