Abstract (en)
[origin: WO2022112611A1] The invention relates to a mold for low pressure casting. Said mold comprises a base part, a cover part, the base part and the cover part delimiting a mold space, and a riser pipe connection opening into the mold space, and wherein a region in which the base part and the cover part contact each other in a closed state forms a contact area. The mold is characterized in that a venting groove is formed in the contact area, said venting groove being communicatively connected to the mold space and to a venting opening.
