Abstract (en)
[origin: WO2022111961A1] The invention relates to a drive arrangement (1) of a vehicle, in particular operable with muscle power and/or motor force, comprising a drive unit (2), a housing (3), wherein the drive unit (2) is arranged between a first wall (31) and a second wall (32) of the housing (3), a first holder (41), which holds the drive unit (2) on the first wall (31), and a second holder (42), which holds the drive unit (2) on the second wall (32), wherein the first holder (41) has a tolerance compensation element (4) which is screwed into the drive unit (2), and wherein the tolerance compensation element (4) is screwed into the drive unit (2) in such a manner that the tolerance compensation element (4) lies against an inner side (31a) of the first wall (31) in order to span a gap (5) between the drive unit (2) and the first wall (3) (figure 1).
