Abstract (en)

[origin: WO2022112211A1] A floor (3) for a lift car (2) comprises a planar base part (4) and installation feet (5) arranged thereon. The installation feet (5) provide support for the lift-car floor (3) on the floor (7) of a lift shaft (6) during the installation phase. In order to orient the base part (4) in a horizontal position, each of the installation feet (5) is designed in the form of a height-adjustable installation foot. The height-adjustable installation foot (5) here has a threaded rod (11) for forming a threaded spindle (10) for height adjustment.
