Abstract (en)

[origin: WO2022112217A1] Electronic component comprising: - a magnetic circuit; and - a plurality of electrical conductors, each electrical conductor being distinct from the others, and being arranged around a portion of the magnetic circuit dedicated to this conductor, the magnetic circuit comprising a one-piece wall through which a plurality of magnetic fields flow, each of these magnetic fields being respectively associated with at least one electrical conductor of the component.
