Abstract (en)

Provided is a flavor inhaler filter-segment that is environmentally friendly, has a good appearance, and has an aeration performance suitable for flavor inhaling. The flavor inhaler filter-segment comprises a tubular wrapper, and a non-woven fabric that includes natural fibers and that is compressed and packed inside the wrapper, wherein the compression rate (A) of the non-woven fabric packed inside the wrapper, which is calculated by a prescribed method, is 20% or more but less than 100%.
