Abstract (en)
A writing instrument (10) comprising:-a barrel (12),-a writing tip (22),-a writing tip extension-retraction system (20),- a biasing member, configured to urge the writing tip extension-retraction system (20) towards a second retracted rearward position,- an actuating system moveable between an engaged position and a released position, configured to maintain the writing tip extension-retraction system (20) in the first extended forward position to lock the latter in this position when it is in its engaged position, and to be disengaged from the tip extension-retraction system (20) so as to enable a displacement of the writing tip extension-retraction system (20) from the first extended forward position to the second retracted rearward position when the button (60) is in its released position, wherein said button is arranged in the barrel so as to be closer from the proximal end than from the distal end.
