Abstract (en)
Wrapping method and packer machine (21) to manufacture a pack (1) with a sliding opening having a tray (3), which contains at least one product (4), and a case (2), which houses, on the inside, the tray (3) in a sliding manner. It is provided to: fold a first blank (10) designed to manufacture the case (2) so as to give the first blank (10) a "U"-shaped conformation having an open upper end; fold a second blank (17) so as to manufacture the tray (3); insert the at least partially formed tray (3) into the first "U"-shaped blank (10); and complete the folding of the first blank (10) around the tray (3) previously inserted into the first "U"-shaped blank (10) so as to manufacture the case (2) already containing the tray (3).
