Abstract (en)
The mounting bracket (6) is intended for installing a roof window in a roof structure and has a first bracket leg (61) for fastening to the roof structure and a second bracket leg (62) for fastening to a frame of the roof window. The second bracket leg (62) is provided with a first engagement means (624) in a first section (621) of the second bracket leg (62) and a second engagement means (629) in a second section (626) of the second bracket leg (62). The second engagement means (629) is configured to assume an inactive position and an active position, and the first engagement means (624) is configured to be received in one receiving structure of the outer side of the frame member in the mounted condition of the mounting bracket (6) on the frame of the roof window, and the second engagement means (629) is configured to be received in another receiving structure of the outer side of the frame member in the mounted condition of the mounting bracket (6) on the frame of the roof window (1) in its active position only.
