Abstract (en)

The invention relates to a system for fastening of a downlight. The system comprising: a support member which can be attached to a hole in a surface as a ceiling or a wall; a downlight fixture for connection with the support member, said downlight fixture comprises an inner member and an outer member, said inner member being for connection with a light source and said outer member being for connection with the support member, said inner member and said outer member being connected such that said inner member can be tilted relative to the outer member, wherein, the downlight fixture comprises a gasket arranged such that it seals the connection between the outer member and the inner member.
