Abstract (en)  
[origin: WO2022161673A1] The invention relates to a banister arrangement (1) for a rail vehicle (20), comprising a banister element (2a, 2b) and a holding element (3), in which the banister element (2a, 2b) is rotatable about an axis of rotation (D), wherein the holding element (3) is designed in such a way that it is attached or attachable as intended to the outside of a rail vehicle (20) in such a manner that the axis of rotation (D) is vertically aligned. The invention further relates to a rail vehicle comprising such a banister arrangement and to a method for operating such a banister arrangement.
