Abstract (en)  
[origin: WO2022122259A1] The invention relates to a frame assembly (1) of a two-wheeled vehicle (10) which can in particular be operated by muscle power and/or by motor power and which comprises a main frame (2), spring-suspended chain stays (3), and at least one connection element (4) which is located on the main frame (2). The connection element (4) connects at least part of the chain stays (3), in a manner pivotable about a joint axis (40), to the main frame (2), and the connection element (4) is designed to secure a drive unit (5) to the main frame (2).
