Abstract (en)

[origin: WO2022227046A1] Method, device and computer program product for wireless communication are provided. A method includes: receiving, by a wireless communication terminal, from a first wireless communication node, a handover command indicating use of a simultaneous-connectivity-based handover; and performing, by the wireless communication terminal, a handover procedure from the first wireless communication node to a second wireless communication node; and maintaining, by the wireless communication terminal, the connection with the first wireless communication node until completion of the handover procedure.
