Abstract (en)

A waste bin (P) comprising a container (1) having an opening (A) that provides access to the compartment (V) of the container (1), a U-shaped handle (2) having two ends pivotally connected to the container (1) with respect to a transverse axis (X-X) relative to the opening (A) of the container (1), and a lid (4) configured in such a way as to close the access opening (A) of the compartment (V); said handle (2) comprises retaining means (5) disposed at one end or at both ends (21, 22) of the handle (2) and configured so as not to interfere with the lid (4), allowing the lid to be moved away from the access opening (A) or so as to interfere with the lid (4), locking the lid (4) in closed position on the access opening (A).
