Abstract (en)

Provided in embodiments of the present invention are an operation request response processing method and apparatus, and a computer readable storage medium. The method comprises: an integrated application is launched in response to a launch request of the integrated application, wherein the integrated application is capable of invoke a plurality of associated applications; an operation request based on the integrated application is received, and an application corresponding to the operation request among the plurality of applications is determined as a target application; and the target application is invoked through the integrated application to execute the operation request. The present invention solves the problem in the related art that operations are complicated when a plurality of APPs on a terminal are used, and functions of associated APPs on the integrated application are integrated by using the integrated application as an entrance, which greatly facilitates usage for users and simplifies operations of users.
