Abstract (en)
[origin: WO2022124885A1] The present invention relates to a surface covering connector, for releasably coupling at least two pieces of surface covering, wherein the connector has a substantially planar top side, a substantially planar bottom side, wherein the top side comprises; at least two connecting portions, for releasably connecting to a piece of surface covering, wherein the connecting portions are mutually separated by a separating portion. The invention further relates to a large surface covering using said connector and a method of connecting pieces of surface covering using the connector according to the present invention.
