Abstract (en)

[origin: WO2022126169A1] The invention relates to a board pair (14) composed of two boards (2) connected together along their longitudinal narrow sides (5) profiled in the longitudinal direction (4), wherein the profiling is preferably a profiling that has already been carried out in the lumber mill when the boards (2) are in the fresh state, the boards (2) originating from the same tree trunk, preferably from the same tree trunk cut into standard raw wood lengths and being cut from corresponding layers of the tree trunk which are opposite one another with respect to a longitudinal axis of the tree trunk.
