Abstract (en)
[origin: WO2022122708A1] The invention relates to a container closure (11) which is made of plastic and comprises a spout (15) having a casing (23) for fastening the closure (11) to a container (13) and for drinking from the container (13), and having a lower edge (25) and a nozzle (29) which adjoins the casing (23) and surrounds a pouring opening (30), with an internal thread (31) being formed on the inner face of the casing of the spout (15) for screwing the spout onto the neck (33) of the container (13). The closure (11) also has a closure cap (17) which is connected to the spout (15) and which, on the inner face thereof, has a sealing element (41) for sealing the pouring opening (30), and a hinge (21) by means of which the closure cap (17) is pivotable relative to the spout (15) from a closed position into an open position and vice versa. A plurality of thread turns (43, 45) are formed on the outer face of the casing.
