Abstract (en)

[origin: WO2022122731A1] Disclosed is a handrail (2) for a person conveying system (3), e.g. an escalator or a moving walkway. A transponder (1) containing at least one piece of information is integrated on the surface of or inside the handrail (2), said transponder (1) being configured such that the at least one piece of information can be transmitted without contact from the transponder (1) to a reading device.
