Abstract (en)

[origin: WO2022123163A1] Said device (16) for controlling an electrical thrust reverser control system (1) for an aircraft comprises electrical supply means (9) and control means (19) which are configured to couple the electrical supply means (9) to the electrical control system (1) when the aircraft is on the ground and to uncouple the electrical supply means (9) from the electrical control system (1) when the aircraft is flying.
