Abstract (en)

[origin: WO2022122478A2] The invention relates to a method for operating a cooking appliance (2), and to a corresponding cooking appliance (2) having a cooking chamber (4) for receiving a product to be cooked (6), having a heating device for heating the cooking chamber (4) and having a control device (14) for controlling at least the heating device. The invention proposes ascertaining a state of loading of the cooking chamber (4) by means of a monitoring device after a mode of operation of the cooking appliance (2) has been set, wherein ascertaining the state of loading comprises at least distinguishing between whether or not a product to be cooked (6) is in the cooking chamber (4), and, depending on the state of loading ascertained, selecting a heating-up programme from amongst a plurality of heating-up programmes for heating up the cooking chamber (4), and carrying out said heating-up programme.
