Abstract (en)

[origin: WO2022122454A1] The invention relates to a method for the conveyance of packets (5) from a sender (10) via at least one station (20) to a recipient (12), wherein an identifier (50) is assigned to a packet (5) to be conveyed; the identifier (50) is recorded in a database (40); data is assigned to the identifier (50) in the database (40); the identifier (50) is read at the at least one station (20); the data assigned to the identifier (50) is retrieved from the database (40); the packet (5) is conveyed further from the at least one station (20) to the recipient depending on the data retrieved. The invention relates to a system for conveying packets (5) from a sender (10) to a recipient (12), comprising at least one station (20), wherein the system is configured to execute the method according to the invention.
