Abstract (en)  
There is provided a flavor inhaler including an accommodating portion that houses a consumable, and a protruding portion that is disposed on a contact surface inside the accommodating portion, that demarcates, in a periphery of the contact surface, a first air passage that communicates with inside of the consumable, and that is capable of coming into contact with the consumable, where the first air passage passes through at least a part of a center part of the contact surface.
