Abstract (en)

There is provided a flavor inhaler including an accommodating portion in which an opening portion is formed on one end, the accommodating portion being for housing at least a part of a consumable through the opening portion; and a support portion that supports the accommodating portion, the support portion including a first abutting surface provided to surround an outer circumference of the opening portion of the accommodating portion, and an extending portion extending from the first abutting surface in a direction away from the opening portion, where the extending portion of the support portion and a part of an outer circumference of the accommodating portion that faces the extending portion are separated from each other such that a space is formed inbetween.
