Abstract (en)

There is provided a flavor inhaler including a housing, a first member that is housed in the housing, a state detection unit that is supported by the first member, and a second member that is housed in the housing, a state of the second member being detected by the state detection unit, where the housing biases the first member against the second member, and the state detection unit is positioned at a predetermined position relative to the second member in a state where the first member is biased against the second member.
