Abstract (en)
Safety hinge for a vertical door, comprising a cam (1) provided with a first vertical cam profile (c1) and a second vertical cam profile (c2), a cam follower (2) provided with a first vertical cam follower profile (f1) configured to work in conjunction with the first vertical cam profile (c1), and a second vertical cam follower profile (f2) configured to work in conjunction with the second vertical cam profile (c2), the safety hinge being configured to move from a first resting position into a second resting position by moving the cam (1) such that the first vertical cam profile (c1) drives the first vertical cam follower profile (f1), and to move from the second resting position back into the first resting position by moving the cam (1) such that the second vertical cam profile (c2) drives the second vertical cam follower profile (f2).
