Abstract (en)

[origin: CA3202415A1] The invention concerns a composition comprising at least one bacterioruberin, preferably in the glycosylated form, optionally as a mixture with different forms of glycosylated bacterioruberins, or an extract comprising it, for its use in a method for the treatment or prevention of a disease involving a deregulation in protein aggregation such as a degenerative disease, for example, advantageously a neurodegenerative disease, fibrosis, advantageously pulmonary fibrosis, or diabetes. The invention also concerns a bacterioruberin, preferably in the glycosylated form, optionally as a mixture with different forms of glycosylated bacterioruberins, or an extract comprising it, for its use in a method for the treatment or prevention of a disease involving a deregulation in protein aggregation, and a method for the treatment or prevention of a degenerative disease.
