Abstract (en)

[origin: WO2022136851A1] The present invention relates to the use of a reduced folate, such as 5-MTHF (5- methyltetrahydrofolate), optionally in combination with tetrahydrobiopterin (BH4) or precursors thereof, for preventing or treating disorders associated with a BH4 deficiency, or low BH4 bioavailability. Such disorders primarily include diseases which have vascular endothelial pathology, or effects on amino acid metabolism or neurotransmission, especially pregnancy related disorders such as pre-eclampsia.
