Abstract (en)
[origin: WO2022128727A1] The invention relates in particular to a device (100) for applying an application agent to a component (30), comprising at least one application agent opening (1) for dispensing the application agent. The device (100) is characterized in particular in that it comprises at least one cleaning arrangement (10) with cleaning openings (11) for dispensing a cleaning fluid, preferably cleaning air.
