Abstract (en)

[origin: WO2022129546A1] A device (1), in particular an electronic throttle system, in particular for motorcycles, having a handle (2) and a measuring arrangement assigned to this handle (3), wherein a rotary movement of the handle (2) is transmitted to and acts on the measuring arrangement, wherein means are provided which convert a rotary movement of the handle (2) into a linear movement of at least a part of the measuring arrangement.
