Abstract (en)

[origin: WO2022139719A1] The invention relates to a ceramic sanitary ware (1) system with the feature of self-cleaning with water and/or detergent and/or disinfectant following the use. More particularly, the invention relates to a ceramic sanitary ware (1) system with a system, which enables the ceramic sanitary ware (1) to be cleaned by way of spraying certain quantity of water and/or chemical to the ceramic sanitary ware (1) depending on the activation of said system automatically and/or manually after the use of said ceramic sanitary ware (1).
