Abstract (en)
[origin: WO2022128923A1] The invention relates to a coupler (200) for a modular scaffold (100), comprising - a coupling tube (210) which, for coupling to at least one standard (300), has at least at one end, preferably at both ends, a tubular portion (211) having a greater external and/or internal diameter, and - a coupling element (220) which, for coupling to at least one ledger (400) and/or a diagonal brace (500), has at least one receiving recess (221, 222), the coupling element (220) being fastened indirectly, via a bracket (230), or directly to the outer circumference of the coupling tube (210). Furthermore, the invention relates to a modular scaffold, a method for producing such a modular scaffold and use of a coupler within the modular scaffold.
