Abstract (en)  
[origin: WO2022126166A1] The invention relates to a mounting device (1) for supporting at least one door leaf (2), comprising at least one support (3) and at least one separate holding device (4). At least one installation device (5) is provided, by means of which the at least one holding device (4) can be releasably secured to the at least one support (3), and the at least one holding device (4) has at least two, preferably more than two, furniture hinges (6), which are mutually spaced in the longitudinal direction of the at least one holding device (4), and/or securing interfaces for securing furniture hinges (6). The at least one door leaf (2) can be supported on the at least one holding device (4) in an articulated manner by means of the furniture hinge (6), wherein the at least one holding device (4) comprises at least one first mounting part (4a), on which the at least two furniture hinges (6) and/or securing interfaces are arranged, and at least one second mounting part (4b), which is arranged or can be arranged between the at least one first mounting part (4a) and the at least one support (3). The two mounting parts (4a, 4b) can be adjusted relative to each other, and the at least one second mounting part (4b) can be adjusted relative to the at least one support (3).
