Abstract (en)

[origin: WO2022128257A1] The invention relates to a method for operating a monitoring system (10) of at least one fastening device (100), wherein an identifier (104) allocated to the fastening device (100) and a fastening property (112) allocated to the fastening device (100) are provided to a computer device (200) of the monitoring system (10). It is proposed that a digital twin (202) of the fastening device (100) is provided with the aid of the computer device (200) by linking the identifier (104) and the fastening property (112), wherein the fastening device (100) is monitored by evaluating the digital twin (202). The invention also relates to a corresponding monitoring system (10).
