Abstract (en)  
[origin: WO2022136289A1] The invention relates to a traction transmission (100-500) for rail vehicles, comprising a gearwheel (121-521) for transmitting a torque, a reservoir (151, 251, 351), and a conveying element (10-60, 152-552), which is connected to the gearwheel (121-521) in a mechanically rigid manner, for conveying a lubricating oil present in the reservoir (151, 251, 351).
